

AMAX Digital Human — Your Intelligent AI Teaching Assistant

One-Stop Platform for AI Digital Human Creation, Presentation Production, and Intelligent Interaction

The AMAX Digital Human Platform is an enterprise-grade AI avatar solution purpose-built for corporate training and higher education environments. By integrating AI avatar generation, intelligent interaction, presentation production, and learning analytics into a unified platform, AMAX empowers instructors to rapidly develop and deploy scalable digital learning resources across a wide range of training scenarios.

Fast Generation

5-Minute Personalized Digital Human

Upload a single photo, and within 5 minutes create a high-fidelity 3D digital human with natural expressions and precise lip-sync, allowing instructors to quickly have their AI counterpart.

Personalized Customization

2-Minute Setup

Complete character design and knowledge base configuration in 2 minutes to create a dedicated teaching “brain,” with 100% of content sourced from the instructor’s own materials.

Voiceprint Replication

30-Second Voice Cloning

With just 15–30 seconds of voice sample input, the platform achieves over 90% vocal similarity — enabling the digital avatar to engage with learners in the instructor’s own authentic voice.

Accurate Interaction

95% Recognition Rate

Achieves over 95% speech recognition accuracy with latency under 1 second, providing smooth, natural dialogue that rivals real human interaction.

All-day online

72-hour intelligent response

Support 7x24 hours to call the knowledge base for real-time questions and answers, and answer questions and intelligent sparring training for students anytime and anywhere.

AI Assistance

Intelligent Content Generation

Automatically generate teaching scripts and lesson materials, and create and create intelligent interactive PPT with one click, greatly improving the efficiency of lesson preparation.

Application Scenario

Teaching scenario

AI teaching assistants are online 24 hours a day, providing students with personalized Q&A, after-class practice and explanation services

Digital avatar

Personal exclusive digital image, which can generate and broadcast PPT with one click to realize cross-platform intelligent reception and publicity

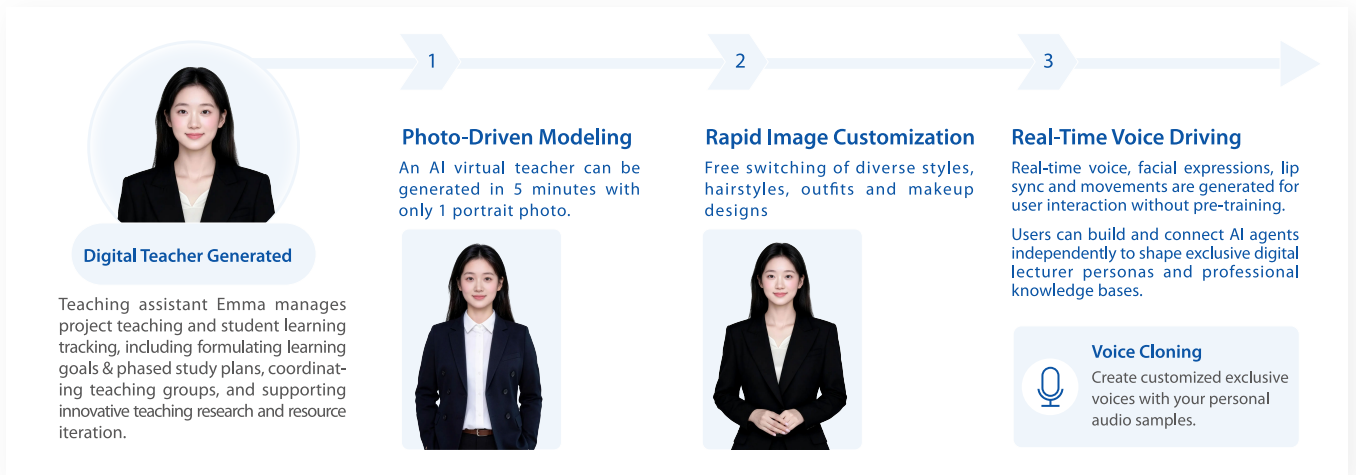

Application

» Digital Training Lecturer Solution

Relying on a professional teaching knowledge base, digital lecturers can deliver customized digital training on demand. It supports automatic keyword-based question generation, real-time answer scoring and result analysis. All Q&A records are automatically converted into training data assets, helping management optimize training systems and providing objective references for employee promotion and job allocation, achieving precise person-job matching.

01 Digital Avatar Cloning

Generate a digital avatar of elite business specialists within 5 minutes, fully replicating their professional presentation style

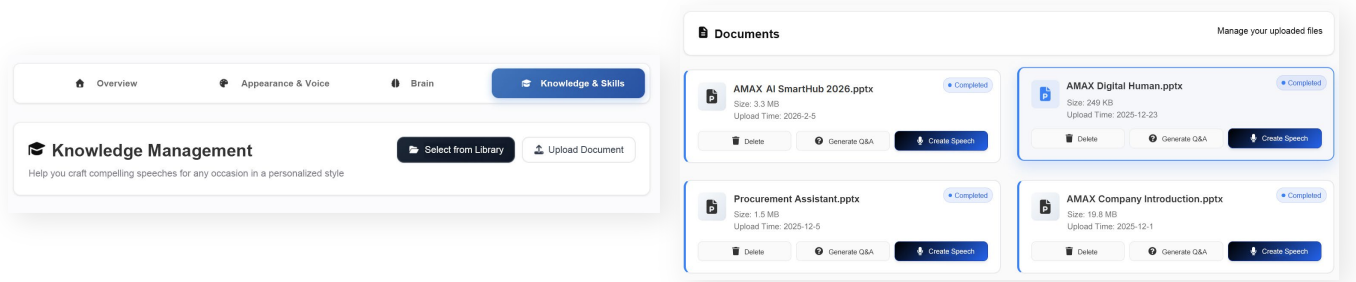

02 One-Click Generation

After uploading PPT files, AI automatically generates full scripts, subtitles and matching digital avatar explanation animations

03 Q&A Interaction Optimization

Realize intelligent interactive Q&A by uploading knowledge bases or question-answer pairs.

- All internal enterprise training materials (documents, images, videos, etc.) can be uploaded with one click to instantly generate AI agents. It supports customized settings of digital human background, personality, persona and professional database, building an exclusive dedicated digital brain.
- AI automatically builds exclusive question banks, eliminates large model hallucinations, and guarantees 100% accuracy of all digital human responses.
